J. E. Hoover, Director
Federal Bureau of Investigation
Washington, D.C.

Dear J. Ed Hoover,

As his just published book, "The Strange Case of Jesse Harlower, Clay Clark, Jr., expresses his gratitude for the information and assistance given him by your bureau.

I have written a book including the Clay case, and I would like to be able to include any information that might be missing.

Therefore, I write to ask for what has been given Mr. Clark, other writers and any other data you might properly give me.

Let me state there has been a court precedent where certain documents earlier have been considered secret to the jury. I am not a lawyer, I merely do not believe that anything or tends to establish that any one has committed, and that is the ultimate proof. Of course there are many contrary indications, I could appreciate it if that is a true fact. I do not believe that it exists, in fact, if the involvement were one person. For example, evidence that while Clay was in jail that someone other than him was, at times, I would pertain only to that person. your bureau that he was entirely alone. Many members of the family say he was not alone, as I interpret their statements.

Your bureau has also released some pictures. I would appreciate possibly you have pictures you may not properly give me, that is to say that pertain to the case. I recall there were some pictures of Clay with a [illegible]

My purpose in seeking this information is to be as complete and accurate as possible. Because that one earlier evil [illegible] was not alone and probably was not the assassin, I am quite sure that the available proofs bear there was no conspiracy and that is the reason.

Thank you for any help you may provide.

Harold Weisberg
